

Access Test Results With Ease

Averity gives you a secure, Web-based environment to efficiently manage your test ordering, reporting and patient data in one easy-to-use application.

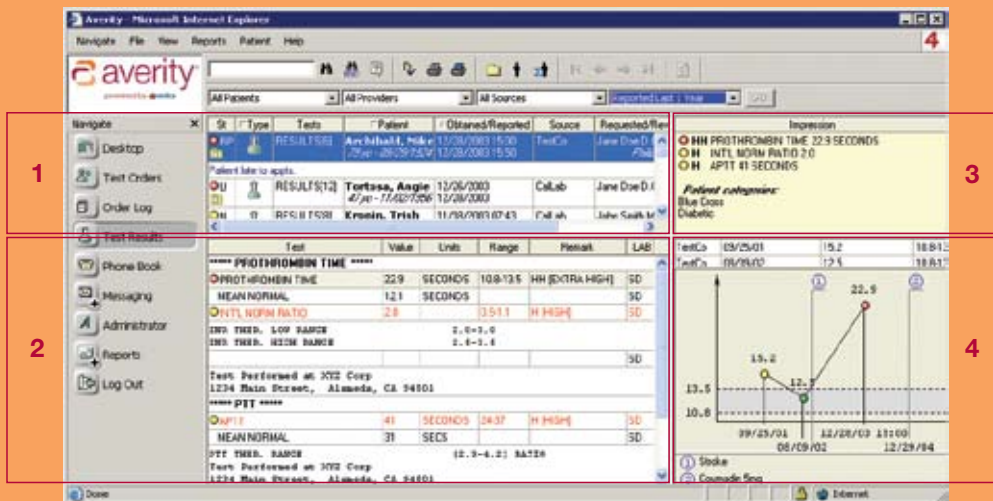

Obtain timely access to test results and the ability to efficiently monitor the progress of your treatment programs.

Averity's Reporting Capabilities Include:

Predefined KDOQI™-based reporting	Eliminates the need to build reports manually and allows data to be exported in various formats
Instant results graphing	Intuitive results page gives every user single-click access to historical test results for instant graphing and comparison with more recent results
Customized result views	Enable you to view data in a way that is most relevant to you
Four-panel results screen	Sophisticated results page (detailed on the back) puts critical information at your fingertips
Microbiology reports	Illustrate trends in Microbiology results over time

The Averity Four-Panel Results Screen

Averity gives you a single, four-panel screen for selecting and reviewing test results – with a focus on critical data.

A simple pick list of all patients with results in the system allows you to quickly select tests for review.

Abnormal results are clearly noted through a simple color coding mechanism so you are always alerted to results that need special attention.

Detailed results are clear and easy to read.

Graphs include key event markers and a legend of plotted items for the simple, immediate interpretation of results.
