

The fully integrated laboratory  
ordering & reporting application

# Korus, our new patient-centered application, gives you

## Backed by clinical experts, designed to streamline your workflow

**Korus** removes all of the guesswork:

- Clinical dashboard provides quick snapshot of your patients and other pertinent information
  - See where your patients stand in terms of clinical parameters for adequacy, anemia, bone health and nutrition
  - View listing of new patients to your facility
  - Quickly access alerts and exceptions
  - View scheduled draw dates and quickly print test requisitions
  - Quickly drill down to orders that require authorizations and additional patient information

- Long-term and short-term orders can be placed using custom test groupings based on your facility's individual protocol
- Robust patient demographic section allows you to enter comprehensive personal and clinical information pertaining to each patient
  - CMS 2728, CMS 2746 and Indigent Patient forms are accessible
- Reports can be easily exported to Microsoft Word, PDF or Excel format

## Providing flexible interfacing capabilities with EMRs

- Korus provides ADT and HL7 interfacing capabilities with various EMRs and billing systems

## Korus helps clinicians:

### Meet industry standards with evidence-driven tools

**Korus** makes it easy to see exactly where your patients and your facility stand in terms of these key industry standards:

- Centers for Medicare and Medicaid Services Measures Assessment Tool (MAT)<sup>1</sup>
- National Kidney Foundation KDOQI™ Clinical Practice Guidelines
- Clinical Performance Measures (CPM)

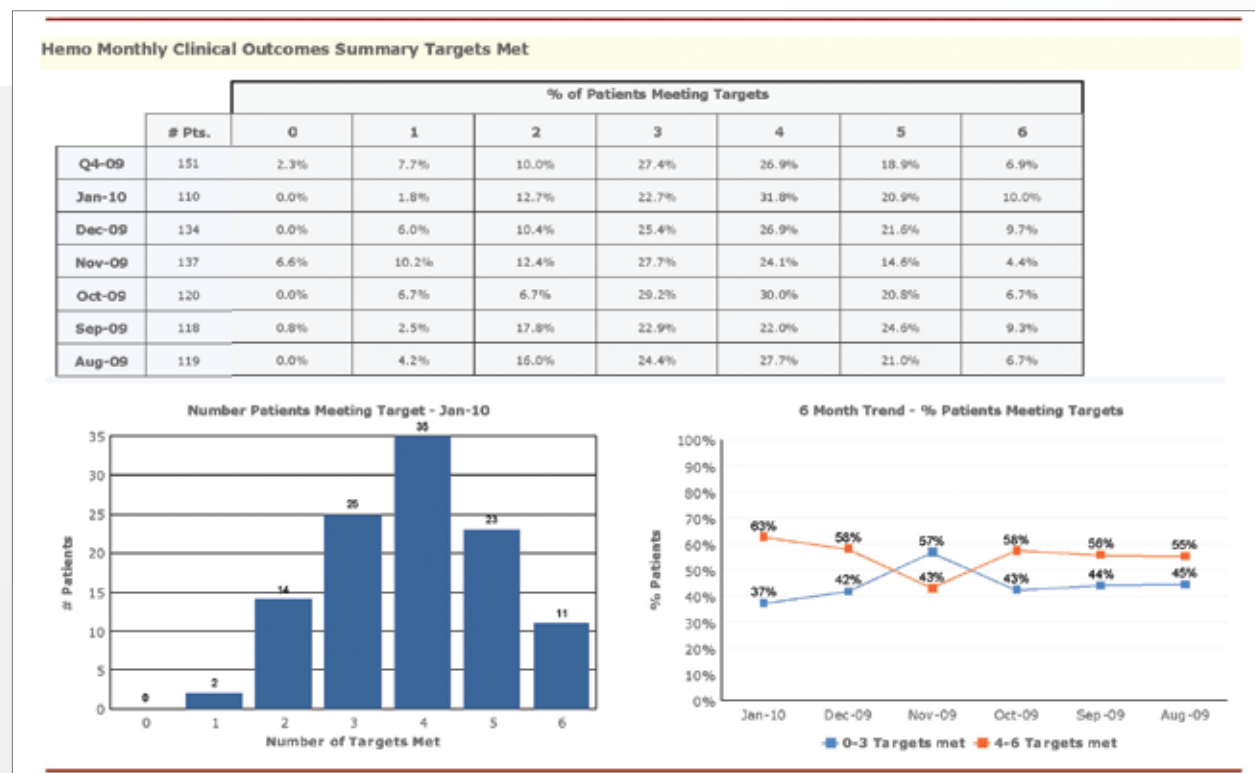

### Meet CMS requirements for an effective QAPI program

Identify your high-risk patients. STAT.

#### Monitor the percentage of patients who are meeting key clinical indicators over time:

- Determine the percentage change in improvement for your patients' clinical outcomes over time—an essential component to QAPI

#### Identify the percentage of patients who are potentially at risk (only 0-3 targets met):

<sup>1</sup> Centers for Medicare and Medicaid Services. Conditions for Coverage 494.110

## Assess clinical performance measures at a glance

**Korus** offers immediate insight with a range of reports for:

- Anemia
- Bone Health
- Hemodialysis Adequacy
- Peritoneal Dialysis Adequacy
- Nutrition
- Hepatitis

## Conduct QA at corporate, facility and patient levels

Our outcome-driven reporting application lets you perform high-level trending of clinical outcomes.

**Korus reports let you:**

- Compare corporate mean values against laboratory mean values
- Compare facilities and identify outliers
- View detailed patient outcomes at a facility level and identify outliers

## Compare clinical outcomes against facility-defined targets

**Korus** lets you see what percentage of patients are meeting or not meeting targeted outcomes over a six-month period:

| Anemia Summary Outcomes  |          |          |          |          |          |          |
|--------------------------|----------|----------|----------|----------|----------|----------|
|                          | Jan 2010 | Dec 2009 | Nov 2009 | Oct 2009 | Sep 2009 | Aug 2009 |
| Patient Count            | 110      | 134      | 135      | 120      | 118      | 119      |
| Hgb Mean                 | 11.6     | 11.4     | 11.4     | 11.6     | 11.6     | 11.7     |
| % Target Met (Hgb 10-12) | 62%      |          |          |          |          |          |
| Hgb < 10                 | 10%      |          |          |          |          |          |
| Hgb 10 - 10.9            | 12%      |          |          |          |          |          |
| Hgb 11.0 - 12.0          | 80%      |          |          |          |          |          |
| Hgb 12.1 - 13            | 21%      |          |          |          |          |          |
| Hgb > 13                 | 7%       |          |          |          |          |          |

## Helping you:

### Give your patients individualized care

Our patient-centered reporting features let you:

- Filter patients by modality (hemo or PD) and by type (prevalent or new)
- Quickly identify outlier lab results for each patient
- Drill down to detailed, patient-specific information in just a few clicks
- Generate customizable patient rounding reports

### Empower your patients to reach their health goals

**Korus** provides patient-friendly report cards that include:

- Colorful graphic images for easy comprehension by the patient
- Customizable notes and recommendations from the care provider
- Three months of laboratory data to help patients track their progress
- English and Spanish language options

## Your patients are our number one priority

**Korus** takes care of your needs the same way you take care of your patients. It puts pertinent patient information at your fingertips. Immediately. **So you can get back to doing what you do best, improving patient lives.**
