

Comprehensive Patient Assessment and Plan of Care

Korus includes an interactive Patient Assessment and Plan of Care to help you meet the requirements of the new CMS guidelines.¹

The Korus Patient Assessment and Plan of Care includes:

- Interactive fields for electronic data entry—information does not have to be hand-written
- Provision for input by interdisciplinary team members—including patient, nurse, physician, social worker and dietitian
- CMS interpretive guidance outcome standards and KDOQI guidelines to assist you in developing the desired outcomes for each patient
 - > Key clinical areas are covered—including relationship of laboratory values to cardio/pulmonary health, bone health, nutrition and diabetes, patient education goals, and psychosocial status
- Laboratory values collected for each patient within the previous three months for trending purposes
